Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:

Step 2: Domain Choice
What domain did you choose to fine-tune the Meta Llama 2 7B model on?
Choices:
  1. Financial
  2. Healthcare
  3. IT
	Healthcare

Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the **model_evaluation.ipynb file**?	Genomic characterization is essential for > the successful development of new antimicrobial drugs. In the first study of its kind, a team of researchers led by the University of Maryland School of Medicine (UMSOM) used a novel method to study the genomic structure of the bacterium that causes tuberculosis (TB ==================================
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the **model_finetuning.ipynb file**?	I could not complete this step due to a permission error when calling the deploy method. I tried to fix this by adding the relevant permission but nothing worked.
